| * Colorfastness to Water  | AATCC 107  | 1 Sample              | Wheels shall be rolled easily on carpet surface and concrete surface.  |  |
|   |  | •                     | Report any finding.  |  |
| Insulation Performance  | With reference to EN 12546-2<br>Clause 3.2   | 1 Sample              | Fill the insulated container to half of the nominal capacity with tap water at $(5\pm1)$ degree Celsius. Record the time taken for the temperature rises to 15 degree Celsius  |  |
| Impact Resistance   | With reference to EN 12546-2<br>Clause 3.3   | 1 Sample              | Fill the insulated container with 0.25 kg of sand at $(-5\pm1)$ degree Celsius for every litre of nominal capacity. Drop it from $(500\pm50)$ mm height above concrete floor on its base and corners. Shall not exhibit more than superficial damage which does not impair its function.   |  |
| * Handle Strength   | With reference to EN 12546-2<br>Clause 3.4   | 1 Sample              | Fill the insulated container with 0.5 kg of sand at (-5 ± 1) degree Celsius for every litre of capacity. Drop it vertically through 100 mm and instantly be arrested for 10 times. Handle and its attachment shall remain functional.  |  |
| * Seepage Test (For discontinuous inner lining<br>or seepage may occur between layers)  | With reference to EN 12546-2<br>Clause 3.5   | 1 Sample              | Fill the insulated container with colored water to 25% of nominal capacity. Shake up and down 25 times in (15 $\pm$ 1) s through (200 $\pm$ 50) mm. No traces of the colored water between inner container, insulant and outer protective case   |  |
| Cleaning Test - Other than Dishwasher or Hand<br>Wash   | Actual Use   | 1 Sample              | Follow the cleaning instruction as claimed, report any finding.  |  |
| Resistance to leaking   | Actual Use   | 1 Sample              | [Cooler box]<br>Should be no leakage when filled with water up to 8 hr.  |  |
| For the state as a seating (Multi Seater) Seating   |  |                       | 1  |  |
| Seat Static Strength  | With reference to EN 1728<br>Section 6.4<br>(Mod.)   | 1 Sample              | No structural failure—with distributed weight as following for 1 min. Simultaneously on both positions for an item with two seats. Simultaneously on two adjacent seats in most adverse combination for an item with three or more seats. If the most adverse position cannot be determined the test shall be carried out at a maximum of two locations. Test load: with claimed weight or 400lbs if not claimed per seat During the test, load the seat(s) that are not being tested with 163lbs Modification= Loading parameter change |  |
| Seat Dynamic Impact   | With reference to ANSI/BIFMA<br>X5.4 Section<br>14   | 1 Sample              | A functional load applied once to each seating position shall cause no loss of serviceability. The test bag (225 lb) shall be raised 152 mm (6 in.) above the uncompressed seat and released one (1) time. Remove the bag and repeat setup and functional procedures for each remaining Modification= Loading parameter changed  |  |
| Stability   | With reference to ANSI/BIFMA<br>X5.4 Section<br>21.5   | 1 Sample              | A downward force shall be applied initially at 45° ± 5° to the test platform by attaching a strap, not to exceed 76 mm (3 in.) in width, centered over the front portion of the seat. The force shall be applied until the total unit weight is transferred to the front support members.  The force shall not be less than 40% of the total unit weight.  |  |
| For the state as a seating (Single Seater) Seating  | Length < 32" (not including arm  | rest):                |  |  |
| Seat Static Load  | With reference to EN 1728<br>Section 6.4   | 1 Sample              | No structural failure – with claimed weight or 400 lbs if not claimed of distributed weight for 1 min.   |  |
| Seat Dynamic Impact   | (Mod.) With reference to ANSI/BIFMA X5.4 Section 14  | 1 Sample              | Modification= Loading parameter changed A functional load applied once to each seating position shall cause no loss of serviceability. The test bag (225 lb) shall be raised 152 mm (6 in.) above the uncompressed seat and released one (1) time. Remove the bag and repeat setup and functional procedures for each remaining seating position. Modification= Loading parameter changed  |  |
