Apparel TD Repeat/Carryover Style Process

KOHL'S TECHNICAL DESIGN | Mar 2026

Agenda

- What is a Repeat/Carryover Style? [Page 3](#)
- TD Repeat and Carryover Style Process[Page 4](#)
- Base Tech Spec (as needed).....[Page 5](#)

What is a Repeat/Carryover Style?

REPEAT Style

- A previously ran style with a slight update or change
- ie. Same construction but we shortened the inseam this time
- ie. new fabric added to existing style

CARRYOVER Style

- An exact style carrying over from one season to the next
- No changes
- Details are the same - fabric, construction, vendor, factory, etc

TD Repeat and Carryover Style Process

All styles should be re-fit
once a year

- Can be reviewed by KTD or CTD

Pre-Production Samples are
required for every season

- Must be available for CTD
- **Required for every OnePLM season - SP and FA (even if same vendor, same fabric)**
- PP sample must be sent to KTD for reference

OPTIONAL: Use Base Tech Spec
(as Needed) (See [slide 5](#))

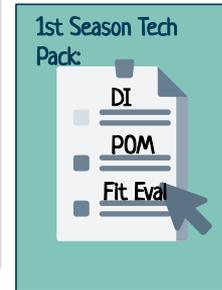

- * Style shells should be set up by fiscal season based on set on floor/INDC months
- * New shells and SSIDs should be updated in onePLM based on the criteria provided on:
 - **GSPS Website**
 - Under: [CTC/OnePLM/Development](#)
 - Section: Style Maintenance**
- * Apparel SSIDs:
 - **K-Link**
 - Under: Private and Exclusive Brands > [OnePLM](#) > Style Info > [Apparel SSID \(Smart Style ID\)](#)

Base Tech Spec (as needed)

Optional Tool that may be used by KTDs

- Typically used when a tech pack cannot hold all artwork for a style, a new shell is created for additional storage
- Select COST BASED OFF or APPROVED BASED OFF in "Phase" drop down box
- Click on hourglass, enter the style number tech pack is based off
- Select the correct style number and season. Base Style Season & Base Style Dev Stage will autofill
- These fields indicate that the vendor should base costing or approval on previous season tech pack
- Request Production to add new vendor to previous season techpack, as needed (ie for costing)
- **CTD - If tech pack does not have a POM page, check overview page to see if Base Tech Spec (as needed) is used**
