

SPARE BUTTON PROCESS

In an effort to understand **customer needs, build efficiencies, & promote sustainability**, we studied the **customer use of spare buttons** provided on our private & exclusive brands & **determined a process change.**

Spare buttons will only be included on the following products if indicated on the DI page for SP 26 costing:

- Full Button Down Woven Shirt/Dress
- Jackets/Coats/Blazer
- Dress Pants
- Specialty Buttons
- We will also **eliminate the poly bags & sew in spare buttons** to support sustainability

Next Steps: SP 26 Handoffs & early development (Kids)

- TD's working on the above products for SP26 will align on spare button need with CFT on a style by style basis
- **TD's add verbiage (Spare Button/s: Yes/No) into DI page** indicating to include or not include. There are **different sewing options available depending on construction**. CTDs should reach out to their KTD on any button questions.

Example of button instruction on DI Page if **"Yes"** include spare button:

Example **"No"** include spare button

DI PAGE: SPARE BUTTON/S: NO

*****If garment has no buttons, no need to indicate**
