Review the hazard, exposure and risk associated with the ingredient. <i>Vendor can submit a 3rd party test report for review if it is within two years of the report issue date.</i>	
*Skin Irritation <i>(Applicable If Material Documentation Is Not Available for TRA)</i>	In-vitro test method	1 sample	Upon request. No skin irritation.	
*Ocular Irritation (In-vitro) <i>(Applicable to eye area products If Material Documentation Is Not Available for TRA)</i>	In-vitro test method	1 sample	Upon request. No skin irritation.	

Title: **Color Cosmetics**
 Protocol Number: **KOHL'S – 505-C**

Test Property	Test Method	Samples	Test Principle / Requirements	Rating (Section or exec. Summary which failed items can be referenced)
---------------	-------------	---------	-------------------------------	---

STABILITY				
*Accelerated Stability Study	Evaluate the stability of product in specific storage condition	6 Samples	Study the following test parameters at t=0, 6th and 12th weeks @40° C/75% R.H. <u>For Color Cosmetics</u> - Appearance - Odor - pH - Net Weight/Net Content - Total bacterial count - Total combined molds & yeast count <u>For Packaging</u> - Appearance <i>Generally accepted industrial requirement: No observable change of sample against the control.</i>	
*Photo Stability (Applicable To Products With Transparent Container Or Packaging)	Evaluate the stability of product in specific storage condition	1 Sample	Exposure under 450W Xeon lamp or lamp using ICH Guideline for 24 hrs. <i>Generally accepted industrial requirement: No observable change of sample against the control. For any surface color change it should be class 3.0 minimum (AATCC grey scale).</i>	
*Freeze Thaw Test (Applicable To Lip Gloss, Lip Stick and similar type of products)	Evaluate the stability of product in specific storage condition	2 Samples	Test duration lasts for 1 week. 1 cycle is from 0 o C to 40o C and back to 0oC for 24hrs. Generally accepted industrial requirement: No observable change of sample against the control. For any surface color change it should be class 3.0 minimum (AATCC grey scale).

---------------	-------------	---------	-------------------------------	---

ANALYTICAL				
*Heavy Metal Contamination (Lead And Mercury)	Acid digestion followed by ICP analysis	1 sample	Lead ≤ 5 ppm lead content (Lipstick & Lipliner) ≤ 10 ppm (eye shadow and blush) (State of California, County of Alameda, Court Case No. H217587 [consolidated with 01-032306]) Mercury Less than 1 ppm for general cosmetics Less than 65 ppm for cosmetics intended to be used on the eye area (FDA – 21 CFR 700.13)	
*Lead In Scrapable Surface Coating	CPSIA Section 101 CPSC-CH-E1003-09.1	1 Sample	≤90 ppm (0.0090% by weight) (CPSA – 16 CFR 1303)	
*Free Formaldehyde Content (applicable for toys-cosmetic and products sold in Minnesota state)	Chemicals of High Concern to Children (CHCC)	1 Sample	Imported/manufacturer may need to report to the authority if formaldehyde is found in the formulation and if the product meets the reporting rules.	

MICROBIOLOGICAL					
*Microbial Contamination (Total Bacterial Count , Total Combined Molds & Yeast Count, E.coli)	USP <61> & <62>	1 sample	Microbial	Limit Value	
			Total viable count for aerobic mesophyllic micro-organism	≤5X10 ³ cfu/g (for non-eye-area products) ≤5X10 ² cfu/g (for eye-area products)	
			Escherichia coli	Absent/ g	
*Microbial Contamination (Additional pathogens)	USP<62>	1 sample	Staphylococcus aureus	Absent/ g	
			Pseudomonas aeruginosa	Absent/ g	
			Candida albicans	Absent/ g	
*Efficacy of antimicrobial preservation	USP <51> + CTFA	10 samples	For Topical products: a. Bacteria (Staphylococcus aureus, E. Coli, Pseudomonas aeruginosa) - Not less than 2.0 log reduction from the initial count at 14 days, and no increase from the 14 days' count at 28 days b. Yeast and Molds (Candida albicans & Aspergillus niger) - No increase from the initial calculated count at 14 and 28 days
