

Chargeurs PCC is a manufacturer of interlinings and other apparel trims with production facilities in the US, China, France, Bangladesh, Sri Lanka, Ethiopia and Argentina. Chargeurs PCC through its global network of support offices aids in the technical application of interlining. We have technical staff to support your factories in the manufacturing of their garments. We test fabrics to ensure compatibility with the interlining and carry this process from development to the final stages of manufacturing.

Chargeurs PCC sells over more than 300 million meters of interlinings every year.

Chargeurs and PCC combined - we have 34 subsidiaries in major garment producing countries around the world and serving more than 90 countries.

We are in the heart of 1600 brands all over the world.

We have interlinings made of recycled polyester fibers with proper documentation like GRS (Global Recycled Standard) Certificate issued by Control Union BV.

Chargeurs PCC is part of Chargeurs Group which is publicly listed in Paris Euronext Exchange.
