OUR HISTORY

QST is a family owned and operated company that dates back to the year 1880 where we started as a horse and cart traveling the streets of Chicago selling textiles to local tailors. Today, we have expanded to over 60 countries across the globe for sourcing, selling, and manufacturing. We have over 700 employees around the world that make up our extended family and we are growing every day. While we have been the world's largest supplier of quality construction components for over a century, our core tenets have not changed –we offer our customers innovative product, global service, competitive value and a consistent quality

OUR QUALITY

QST stands for Quick Service Textiles and that is exactly what we do. We ship high quality products for your garments around the world just in time for your production. Each of our products go through a critical number of steps to ensure that what is leaving our factories is on par with our customer's expectations. QST also offers several products that are OekoTex certified, as well as Reach compliant.

We understand that our customers are counting on QST to help them make a better garment and we are up for that challenge.

UNIQUELY POSITIONED ACROSS THE GLOBE FOR JUST-IN-TIME DELIVERY ON ALL YOUR PRODUCTION NEEDS

BAN-ROL

COMFORT

FUNCTION

INNOVATION

STRENGTH

QST's world leading "Non-Roll" waistband insert, with ultrasonically sealed edges, famous for eliminating unsightly waistband roll-over in pants, slacks and skirts.

«  **ULTRA BAN-ROL 300**

Our heavy duty Ultra Ban Rol was built for the Work Wear industry. Its firm, strong hand is sturdy and can withstand all of the challenging elements of the working environment.

 **SOFT-FINISH BAN-ROL 300** »

The perfect addition to your menswear pant. Its unique properties add much needed waistband support giving the wearer added comfort guaranteed for the lifetime of the garment.

«  **SOFT-FINISH BAN-ROL 520**

Providing the ultimate comfort in waistband stability. Its soft hand pairs well with lighter weight shell fabric. We recommend this product for the Women's Wear industry.

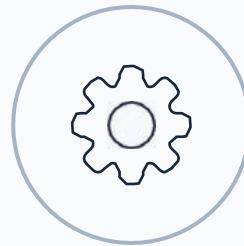

ELASTICS

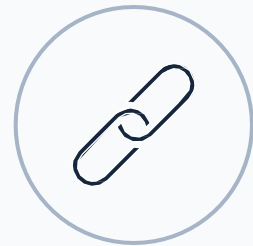

COMFORT

FASHION

FUNCTION

STRENGTH

From the finest dress pant, to an athletic short, or even a medical brace, our versatile line of elastics offers the stretch and recovery you need in every industry.

«  **Q-STYLE**

From jacquards, prints, and embossing to color, texture, and amount of stretch preferred, every elastic is customizable. Printing capabilities include screen and sublimation with the ability to print reflective parts.

 **POWER GRIP** »

This collection was designed with the functionality to keep shirts tucked in. Silicon grippers can be applied in a variety of applications. Our gripper options include silicon logo or decorative design as well as woven-in grippers.

«  **HERITAGE**

Get back to the basics with our tried-and-true Heritage elastics collection. This assortment includes the fundamental elastics that are essential to the comfort of any garment with a variety of stretch performance.

 **QST MED** »

Elastic components for the medical field. QST has designed into a functional line that is suitable for medical braces, straps, and compression garments. We can customize any of your needs for the medical industry.

QST RUGGED

QST Rugged was designed with the work wear industry in mind. These heavy-duty elastics add necessary strength and stability to withstand any working environment.

QST INTIMATES

Designed for the intimate apparel industry, we offer a wide range of the most delicate and lightweight elastic components adding stability and comfort.

Q-TILITY

Designed with functionality and efficiency in mind, our practical collection of elastics is designed with purpose and includes both drawcord and button holeelastic.

FREEDOM

Made in America, our Freedom elastics are USA strong. The collection is both Berry Compliant and Fiber Forward. Freedom is used exclusively by the US Armed Services.

EMBROIDERY BACKINGS

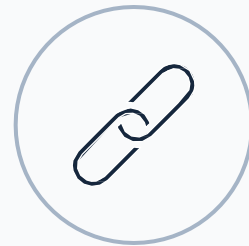

COMFORT

INNOVATION

REINFORCEMENT

STRENGTH

In partnership with JSI, we offer the widest selection of quality embroidery backings in the market with the ability to customize any product to meet your production needs.

«  **QUICK TEAR**
TEARAWAY BACKINGS

QST's vast line of Tearaway backings were designed with efficiency, speed of production, and convenience in mind. Our Quick Tear products provide solid re-inforcement and are ideal for monogramming and appliques.

 **Q-STABILITY**
CUTAWAY BACKINGS »

This line offers the necessary strength and re-inforcement needed to ensure the embroidery on your garment gets the necessary support. Q-Stability is great for any usage and comes in light weight options.

«  **Q-SCREEN**
SCREEN PRINTING

This collection can be best used to test screen prints before printing production. You will find great comfort in the fact that Q-Screen is perfect for trouble shooting a screen, finding mistakes, and reducing waste.

 **QST F.I.T.**
SPECIALTY PRODUCTS »

This innovative collection is made up of our water soluble backings, heat soluble backings, no-show poly meshes, and press + tears. It works well with light weight fabric applications, softness issues, and stability.

INTERLINING

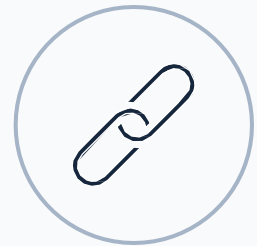

COMFORT

LIFE CYCLE

REINFORCEMENT

STRENGTH

QST ultrafuse is a high performance interlining collection developed to exceed the diverse demands and applications of today's apparel market.

«  **ULTRAFUSE EZ**

Ultrafuse EZ is designed for sensitive fabrics with the ability to be applied as an anti-fraying agent for destructed denim. It can be fused by a hand / steam iron with ease.

 **ULTRAFUSE** *Soft Touch* »

Ultrafuse Soft Touch is designed as a softening agent. The basket weave construction ensures movement and is highly recommended for coarse, raw or unwashed fabrics.

«  **ULTRAFUSE STRETCH TECH**

Ultrafuse Stretch Tech is designed to move. Normal knitted interlinings only stretch but lack recovery. Comfort adds stretch without losing the body and shape of the garment.

«  **ULTRAFUSE GECKO**

Ultrafuse Gecko is designed for coated fabrics. Normal interlining for water repellant, waxed, or other coated fabrics lead to low bond strength. We ensure excellent bonding without alteration.

 **ULTRAFUSE EB** »

Ultrafuse EB covers the back of the embroidery design and protects the skin against itching and scratching from the embroidery.

«  **ULTRAFUSE UNLTD**

Ultrafuse UNLTD is designed with the most advanced adhesive system, withstanding unlimited washes and dry cleaning. It endures the enzyme wash, steaming, and finishing for performance.

LININGS

COMFORT

FASHION

FLEX

INNOVATION

Take your garment design to the next level by selecting a lining quality from QST's diverse and innovative collection.

«  **QST LUXE**

We carry top of the line blends including bembergs, viscoses and acetates as well as prints and stretch qualities. These fashion-forward, luxurious linings are ready to compliment your finest jackets.

 **Q-STYLE** »

Q-Style is our stylish fashion lining collection which provides the industry with the most fashionable custom printing options in the season's most anticipated color palettes and textures.

«  **ECO**

Designed with recycled polyester lining qualities. They are built in-line with our company-wide commitment to reduce our carbon footprint while still offering the utmost comfort for your garments.

«  **STRETCH TECH**

Our innovative Stretch Tech linings are designed to move with your garment. The flex technology allows the linings of your garment to stretch and recover while adding optimal comfort.

 **QST F.I.T.** »

Our F.I.T. linings have innovative finishes such as water resistance, poly urethane, and moisture vapor permeable. They include a wide selection of power meshes with breathability technology through wicking and antimicrobial finishes.

«  **HERITAGE**

QST's Heritage lining collection re-iterates our devotion to quality and comfort with an assortment of our tried and true styles proven to exceed our customers' expectations time and time again.

POCKETING

COMFORT

FASHION

FLEX

STRENGTH

Over 220 million people put their hands in our pockets every day.
See what makes our selection of pocketing the best in the business.

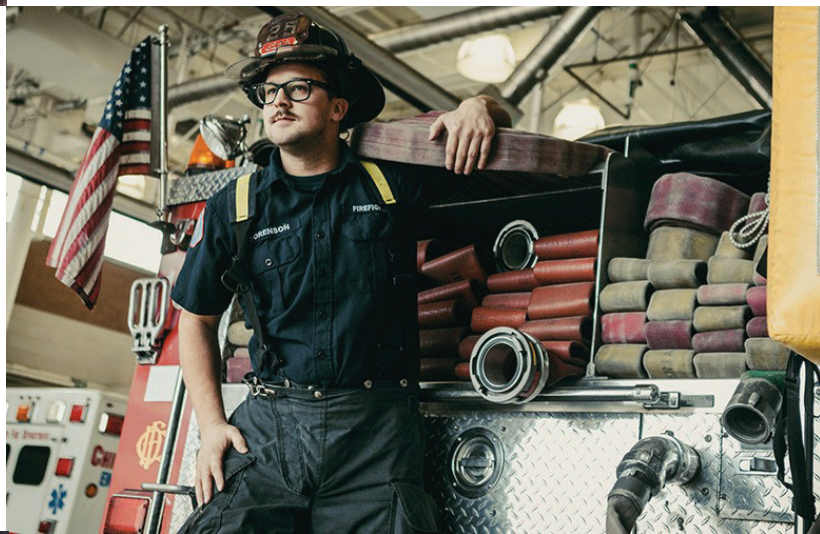

«  **ECO**

No waste. No chemicals. Less Water. Our ECO pocketing collection was built in-line with our company-wide commitment to reduce our carbon footprint while still offering the utmost comfort.

 **FREEDOM** »

Made in America, our Freedom pocketing is USA strong. This collection is both Berry Compliant and Fiber Forward. Freedom is used exclusively by the United States Armed Services.

«  **HERITAGE**

Heritage pocketing re-iterates our devotion to quality and comfort with an assortment of our tried and true styles proven to exceed our customer's expectations time and time again.

 **QST F.I.T.** »

Function, Innovation, Technology. This collection was designed for the Active Wear industry and provides comfort through our power meshes and our wicking and breathability technology.

«  **QST RUGGED**

For the roughest and toughest of our customers –our QST Rugged pocketing is an assortment of the strongest pocketing available in the market. You won't be able to tear through no matter how hard you try.

 **QST SHIELD** »

QST Shield is our newest addition to the Workwear Collection. Designed with the safety of the worker in mind, QST Shield contains fire retardant technology and provides the strength to protect against flash flames.

«  **Q-STYLE**

Q-Style is our premium fashion collection which provides the industry with the most fashion forward prints and yarn dyes in the season's most anticipated color palettes and textures.

 **STRETCH TECH** »

Our Stretch Tech pocketing was designed to move along with your garment. Our flex technology allows your pockets to stretch and recover while adding optimal comfort for the wearer.

Q-LOOP

ANTI FRAY TAPE

FUNCTION

LIFE CYCLE

REINFORCEMENT

STRENGTH

An exclusive QST product used to stabilize fabric yarns to prevent denim belt loop fraying.

QST'S Q-LOOP PRODUCTS

- » Eliminates the costly, labor intensive hand-trimming during production
- » Improves the appearance of the belt loop for the life-time of the garment
- » Available in various sizes (regular, plus, and premium) depending on your production needs

Q-LOOP PROCESSOR

Specifically designed to completely melt Q-Loop resin tape into the belt loop allowing it to penetrate the fibers, preventing fraying during the finishing and washing process.

The unique beltless operation and no cost processors are available for customers who purchase an agreed upon amount of Q-Loop each month.

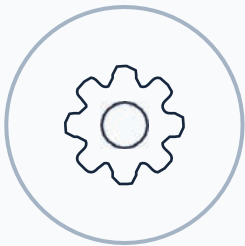

NOT MAKING DENIM?

GLU-LOOP

FUNCTION

LIFE CYCLE

REINFORCEMENT

STRENGTH

QST's exclusive technology to add shape, body and durability for all
of your other belt loop needs.

DESIGNER GLU-LOOP

- » Recommended for use in Menswear, Casual Wear, and Women's Wear
- » Known for its long lasting durability
- » Easy stitch-less application

INDUSTRIAL GLU-LOOP

- » Recommended for use in Work Wear
- » Known for its firm hand and lasting durability
- » Easy stitch-less application

WAISTBANDS

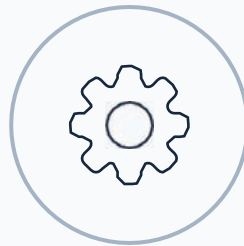

EDGE CONTROL | BIAS BINDINGS | FLY

FASHION

FLEX

FUNCTION

INNOVATION

Our diverse and innovative waistband collection supports both fashion and function. Waistbands come made-to-order; customize it anyway you desire to fit your garment.

«  **Q-STYLE**

Q-Style waistbands are for our fashion-forward customers and are 100% made-to-order. Customize your waistband curtain with an all-over screen print, colorful piping, or a decorative tape. We suggest Q-Style waistbands for formal and casual wear.

 **STRETCH TECH** »

QST's innovative Stretch Tech waistbands are designed to move along with the rest of the garment. Our flex technology gives your waistband the stretch and recovery needed to provide ultimate comfort for the wearer.

«  **QST RUGGED**

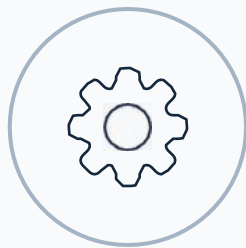

QST Rugged waistbands were designed for the Work Wear industry. Customize your waistband curtain with a printed logo, silicon strips, or gripper tapes to add function to your band.

QST EXCLUSIVE

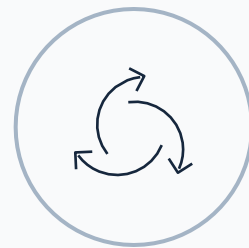

FLEX

FUNCTION

INNOVATION

LIFE CYCLE

A collection of QST's proprietary product categories all working to improve the technical aspects of your garment and better the life of your clothing.

«  **FUSE & STRETCH**

A stretch interlining adhesive combined with our innovative flex technology that allows your waistband to move along with the wearer and provides both stretch and full recovery. Customize any waistband construction with our durable fuse.

 **QUICK STRETCH** »

QST's Quick Stretch is sturdy clear elastic that can be applied as a seam reinforcement or can be used in men's, women's and children's garments to permit stretch, recovery and added comfort. Also can be used in the medical and industrial fields.

«  **Q-THREAD**

Offering an innovative solution to the never-ending problem of loose buttons falling off of garments. Q-Thread is a button wrapping thread that ensures button security for the life of the garment. Button wrapping machines are also available for purchase.

«  **ANKER TEX STAPLES**

Replace the tedious task of pinning with QST's Anker Tex Staples. These functional staples are gentle on all fabrics and are removed seamlessly without leaving any tears or marks. Can be used for sleeve vents, facings and borders, cutting pieces and sleeves, interfacings for sleeves, and much more. Anker Tex staples are renowned for their reliability and quality.

 **PAPER PRODUCTS** »

Offering innovative ideas for use of paper products in any CAD system or cutting room. Our wide variety of paper products include bond, recycled newsprint, craft underlay, perforated and punched craft paper, manila, separating tissue, and polysheeting high density. We also offer other supplies needed in cutting facilities such as adhesives, lubricants and fabric cleaners.
