KOHL'S
EAS Tagging Guide

This document details the EAS tagging requirements for our vendor source-tagging programs.

Contents

EAS Source Tagging - Hard Tag Requirements

- Kohl's has found that vendors who attach EAS hard tags at the production facility are more efficient than the application process at store level
- *Ecommerce receipt units should not receive an EAS hard tag*

Kohl's EAS Ordering Website Instructions

Registration
Jenny Shen: jenny.shen@pactgroup.com
Stacy Erickson: stacy.erickson@pactgroup.com

Kohl's will be covering the costs of the tag and freight. All shipments will be delivered DDU (Delivery Duties Unpaid). It is the responsibility of the vendor to cover import duties, taxes, etc. (if applicable).

Vendors are liable to provide accurate and correct information within the ordering website. Kohl's reserves the right to charge back vendors for the incorrect tags being ordered at cost of tags plus handling and administrative costs incurred.

Fashion and Sterling Ring Cards

- All fashion and sterling ring card vendors are to order all ring cards through A&H
- Ring card orders will include the new security solution. This solution cannot be ordered independently to be used with another vendor's ring card
- Vendors will be open to chargebacks for ordering ring cards from other suppliers
- Contact Information:
  - Vendors can also log into www.aandhusa.com for training videos on the application process of this solution. Instructional videos are located under the product tab
  - Each card will include: the 1 piece ring solution and 1 zip tie

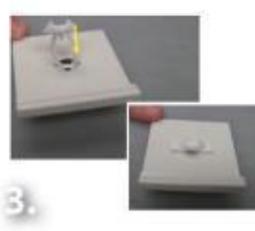

KOHL'S 1 PIECE RING SOLUTION

Locking Ring Card Instructions (From A&H Mfg. Co)

COMPONENTS AND TOOLS REQUIRED

notches — HOLE — **CARD**

RING SOLUTION

Tail — **CABLE TIE** — Lock
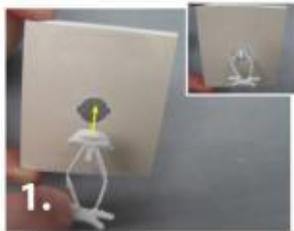

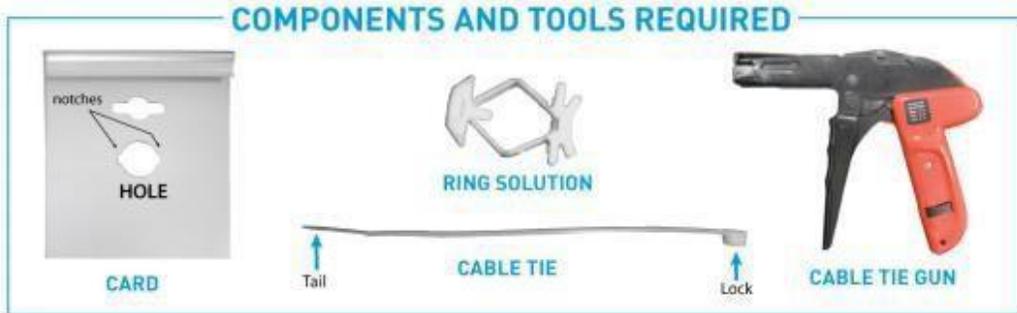

CABLE TIE GUN

1. Insert one piece ring solution; with smaller end first, through the front of the ring card.

2. Pull ring solution flush to front face of card

**3.** Squeeze together until the ring solution snaps close

4. From back of card thread tail of cable tie through bottom slot (A), and pull to very end as shown (B).

RIGHT — WRONG

5. Add ring to cable tie on front of card.

6. Thread tail end of cable tie through top slot.

7. Pull completely to end - while guiding ring to stand in upright position.

8. Feed cable tie tail through lock as shown.

9. Pull by hand to remove all slack.

10. Insert tail of cable tie into cable tie gun and pull trigger. Repeat until ring is tightly fastened. Gun will cut off tail automatically.

EAS Source Tagging - MHz Tag Requirements

- Kohl's has worked with our EAS (Electronic Article Surveillance) suppliers to develop a type of security tag for the express purpose of attaching it at the source of production
- Kohl's has found that vendors who attach EAS soft tags at the production facility are more efficient than the application process at store level
- Moreover, the application at the production facility will ultimately result in better merchandise presentation, improved speed of goods to the sales floor, reduced inventory shortage, and better in-stock positioning

Kohl's asks that the following targeted merchandise receive an EAS Label
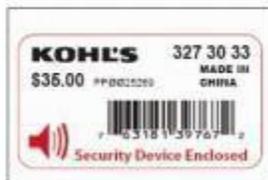

Targeted Merchandise
Targeted merchandise is as follows and has been selected based on theft trends and inventory shortage rates.
