Cost & Counter Guidelines - DESIGN & TD

See the <u>C&C Meeting Guide</u> for meeting structure, inputs & outputs

CLARITY + COMMUNICATION

DESIGNER

Enter a DECISION STATUS on your sample request in onePLM when making comments

This **triggers the alert to the vendor** with your comments

Rejecting a round auto creates another sample request

Call out if spec changes are being made in the design comments This makes it clear to the vendor that they need to look at the POM

There is no auto alert to the vendor when a POM is changed

TECHNICAL DESIGNER

Update spec measurements as needed

This flows from the Fit Eval to the POM so all vendors can see the updates.

Note: Vendors do not see comments on the Fit Eval at this stage as no vendor has been landed yet

STREAMLINED NAVIGATION

DESIGNER

Use the left nav Sample Tracking search when entering your comments in onePLM - this allows you to stay on <u>one page</u>. See video below!

Tip: Don't forget you can copy and paste the same comments as you go!

Cost & Counter Guidelines - VENDOR

WHAT IS A COST + COUNTER MEETING?

A meeting where your **samples are reviewed by design and tech design**. **Comments** are made by **design** (best practice is on the onePLM's sample request) and **technical design** will **update POM specifications** if necessary.

CLARITY + COMMUNICATION

Check your inbox for auto email alerts showing what sample comments were made by Kohl's design

This is triggered when Kohl's selects a "Decision Status"

When Kohls rejects a round, it auto creates another sample request and sends a new auto email alert to you

OPTIONAL: Sign up for tailored alerts by style to easily track POM changes. See page 2 of our alerts job aid on onePLM's K-Link support page.

Allows you to get a notification to the email address associated with your login account (this is different than the email receiving your auto alerts)each time a POM is updated.

This must be done one style at a time

STREAMLINED NAVIGATION

To quickly review Kohl's sample comments on multiple samples:

Use the left nav Sample Tracking search - this allows you to stay on <u>one</u> page. See page 8 of our Sample Management guide.

Tip: you can navigate to and from styles from the sample search to view POM's.
