

Sample Yardage Process

Starting in SP25 development sample yardage requests will be consolidated and will be directly requested by the Global Materials Team to the mills. Exceptions are required in some brands where the Production or Materials Team may reach out to reserve sample yardage through the vendor. As discussed on the previous slide, be aware of the sample type and yardage needed. For all development requests please ensure you have enough yardage for print strike offs as well.

A Kohl's nominated supplier will reach out to you requesting sample yardage. This must be **delivered** to the Kohl's nominated supplier as per the requested date. Please keep in mind this date **includes fabric transit to the vendor**. If you are unable to meet this deadline, please advise. Please note this request might not include all the platforms you work on for Kohls as some teams will work with vendors to reserve sample yardage.

Please note specific information provided in attachment sent

***Please note This request may include two types of sample yardage request.*

- *Requests listed as “**counter sample**” should be dyed fabric in a neutral color- black, navy, tan*
- *Requests listed as “**color run sample**” should be prepared as greige fabric until the vendor contacts you for further color guidance.*
- *For all development requests please ensure you have enough yardage for **print strike offs***

Please note sample yardage requests are based on **projected** style development. There may be variance in needs. We ask for your partnership in ensuring liability for variance is not passed onto Kohls.

Thank you,
Kohl's Materials Team
