

## Style Level Dashboard

1. Can access next to merchant group for quick access or through product drop down on the global header.

2. Displays items at a style level and will now display Product Launch date for each style to help prioritize workload. Default view will be attribute timeline, but you can toggle between attribute & image timeline. Assigned To, Due Date and Status will update when you toggle between timelines. You can also select view/edit to access or take action on the merchant group.
