

C-TPAT Seal Inspection

A seal inspection process should be implemented to ensure the integrity of cargo containers throughout the supply chain. The View, Verify, Tug, Twist (VVTT) Seal Inspection Process will ensure that cargo is secured with a compliant seal. This process should be documented in a procedures manual and each inspection should be included in shipment files.

View seal and container locking mechanisms. Excessive

Verify seal number for accuracy. Compare with shipping documents.

Tug on seal to make sure it is affixed properly.

Twist & Turn seal to make sure it does not come off.
