GENMORE (SCIL Zipper) established in 1988.

Most of our employee have over 32 years of Zipper manufacturing experience.

Besides, Our factories are run by a very experienced production team and are equipped with the most modern manufacturing equipment. All manufacturing is done under full-time supervision to ensure the highest quality, shortest delivery, and lowest price.

Our factories are located in Taiwan and China. We are an “ All in One Factory”.

We produce zipper on our own. From knitting zipper tape, dyeing, produce slider and puller, design zipper puller molds, Electroplating and Painted puller finished. All completed in our own factory to ensure safety quality.

We follow the “Component Test Program” to ensure the safety of the raw materials and finished goods. We monitor our raw materials quality starting from the time we purchased. All raw materials with a batch # to track on each order to provide the safety product to our customers. Especially, We have deep experience in producing safety zippers for children wear.

Genmore is a pioneer in zipper development with more than a hundred of our own patents around the world. We work closely with our buyers to provide the new trims development FREE. One special design is the Genlight zipper, which has various color threads injected into the slot teeth’s grooves; it is safe and durable.

We strive to provide the best quality, the best price, the shortest lead time, and the best service to our clients.
