Questions for CTD to answer

Based on what they learned on the Kohl's Connection tutorial, answer the following questions:

1. Where do you enter fit samples in onePLM?
2. Where do you insert photos and comments for the fit sample?
3. How would you communicate the accept or reject status of a garment to Kohl's?
4. How do you communicate fit results of the garment to Kohl's?

onePLM Assessment Answer Key

1. Create Fit Eval's off of POM pages. The Fit Evals track fit sample rounds.
2. Fit Evals within onePLM have a comments section for Kohl's and our CTD partners to enter fit, and construction comments. The Fit Eval also has an "Attachments" tab. This tab houses our pictures, and pattern files.
3. Use the fit status template which is designed to create uniformed responses across Technical Design. Based on the sample's next steps, a pre-written response is selected and entered it into the comments section.
4. Within each Fit Eval we select the fit status, construction comments, and fit comments within our Kohl's TD comment box. The POMs (Point of Measure) lines below detail how our sample measures, compared to the desired spec. We include detailed spec updates here also.
